COLORLAC ITALY - WOOD PRODUCTS

Wood liquid dyestuffs

Colsperse Series

High concentrated azo metal-complex dyes solution, particularly suitable for wood stain. They can be diluted in water and polar solvents.

Aquacol Series

High concentrated azo metal-complex dyes dissolved in water/glycoether. They are suitable particularly for wood stain and can be diluted in water and other polar solvents.

TC 10000 Series

Universal dyestuffs suitable for wood spray or roller painting, with good resistance to bleeding with polyurethane over-coatings.

CV Series

Universal dyestuffs at high concentration suitable for wood spray painting, for the tinting of solvent-based finishing varnishes.

TW Series

Universal dyestuffs at high concentration in water solution suitable for wood spray or roller painting, appropriate for immersion of beech wood handmade products.

TW Positives Series

Universal dyestuffs at high concentration in water solution suitable for wood spray or brush painting, apposite to obtain positive effect on conifer wood.

SD Series - Colorsol

Highly brilliant solvent dyestuffs with good solubility in a wide range of solvents, particularly recommended for transparent and light resistant dyestuffs, varnishes and inks.

THS Series

Universal highly concentrated metal-complexed liquid dyestuffs for wood, with good resistance to water spotting.
